

Marampa Mines Limited (MML) is Hiring

Job Advertisement

Developing and growing talent and skills within Sierra Leone, for Sierra Leone.

Position Title	Instrumentation Supervisor (<i>Internal Opening</i>)	MML is an equal-opportunity employer. Women are strongly encouraged to apply for roles at MML.
Job Code/Level	At Supervisory Level	
No. of Positions	1	
Department	Engineering & Maintenance	
Location	Marampa Mines Site, Lunsar	
Reporting to	Instrumentation Superintendent	
Salary	Attractive	

ROLE AND PURPOSE

MML is seeking an Instrumentation Supervisor from our current workforce. As an Instrumentation Supervisor, you will play a key role in ensuring the reliable operation of instrumentation systems critical to our mining operations. Your primary focus will be on supervising and leading a team of instrumentation technicians, overseeing maintenance activities, and ensuring the effective functioning of various instrumentation devices and control systems. This role requires a hands-on approach to troubleshooting, calibration, and maintenance and the ability to collaborate with cross-functional teams to optimise instrumentation systems.

RESPONSIBILITIES

- Lead and manage a team of instrumentation technicians, providing guidance and support in daily operations.
- Foster a culture of safety, teamwork, and continuous improvement within the instrumentation team.
- Develop and implement comprehensive preventive maintenance programs to maximise equipment reliability.
- Collaborate with maintenance planners to schedule and execute routine maintenance activities, minimizing downtime.
- Oversee the calibration and testing of various instrumentation devices and control systems, ensuring accurate and reliable measurements.
- Ensure compliance with industry standards and regulations in all calibration procedures.
- Plan and supervise the installation and commissioning of new instrumentation systems, working closely with project teams.
- Collaborate with engineering teams to integrate new technologies and upgrades seamlessly into existing systems.
- Maintain detailed and up-to-date records of instrumentation maintenance, repairs, and calibration activities.

**Developing and growing talent and skills within
Sierra Leone, for Sierra Leone.**

- Generate comprehensive reports on equipment performance, failures, and recommendations for continuous improvement.
 - Collaborate with other departments, including Operations and Process Engineering, to optimize instrumentation systems for enhanced operational efficiency.
 - Communicate effectively with internal stakeholders to address concerns, provide updates, and contribute to overall operational success.
 - Enforce and promote strict adherence to safety standards and regulations within the instrumentation team.
 - Conduct regular safety training sessions and audits to ensure a safe working environment.
-

EDUCATION & EXPERIENCE

- Bachelor's degree in Electrical/Electronics/Automation/Computer Engineering or a related field from a recognised university.
- 5 years of related work experience in an industrial/engineering setting.
- Demonstrated familiarity and proficiency in various electrical/electronic systems, tools, and methods.

REQUIRED SKILLS

- Strong knowledge of mining processes and the specific instrumentation requirements.
 - Familiarity with industry standards, regulations, and best practices.
 - Excellent leadership, communication, and interpersonal skills.
 - Proficiency in relevant software and tools for instrumentation activities.
 - High proficiency in MS Suites (Word, Excel, Access, PowerPoint, Projects).
 - A keen interest in exploring and adopting new technologies.
 - Strong troubleshooting and problem-solving skills, with initiative in self-development.
 - Effective communication skills (written and oral), and ability to convey complex information.
 - A proactive, innovative, collaborative, and the ability to work independently.
 - Ability to work in a dynamic and fast-paced environment.
 - Safety conscious with a strong commitment to comply with safety regulations.
-
